

# *Do you want to be part of creating a Social Enterprise?*

## JAMBO SANAA

ART, CREATIVITY AND EDUCATION

- Greatfulness of how we can make an impact with our work
- Empowering people!
- Having fun! :-)
- Showing interest and listening to other people's needs and wishes
- Consistency – commitment to the project in order to make it sustainable

We believe that children need the opportunity to receive creative education that is student-centred in order for them to pursue their life goals and become leaders and employees.

We also believe in the fact that different stakeholders of the community have to collaborate to give that opportunity.

Based on these beliefs, our theory of change is that if artists and teachers at Kayanga Primary School conduct art workshops and incorporate creative teaching techniques into their teaching method, then:

- Children will become more creative (in any academic subject and aspect of life), confident and socially responsible
- Teachers will be empowered to develop new methods of teaching

Furthermore do we believe that the western world should have the opportunity to learn about the creative achievements made in Tanzania, and therefore the second part of our theory of change is that if regular artistic exchange programmes between Tanzania and Germany (and possibly the UK in the future) take place, then:

- Visitors of these exhibitions in Germany, in particular children, will get the opportunity to discover what the creative ideas of Tanzanian children are
